MSTE is a program and a community of practice dedicated to facilitating the two-way transfer of knowledge between the University and the community. MSTE studies the problems of education, communication, and disseminations of new knowledge in the era of rapidly changing technologies and the growing need for broad STEM literacy. MSTE’s extended network of collaborators includes K-12 schools, entrepreneurs, University faculty and staff, and community organizations that are similarly concerned with education, innovation, and organizational change.

Located at mste.illinois.edu, the MSTE website offers a variety of educational resources to stimulate mathematical and scientific thinking.
